

Product data sheet

Butyl Gasket

Description

- Metal Zinc's Butyl Gasket is a high-quality, UL 723 listed: R39457, gray butyl tape. It is used to bond and seal HVAC systems, metal roofing, windows, gutters and roof penetrations.

Features

- Trims easily and cleanly
- Superior adhesion to metal surfaces
- Stronger than putty
- ASTM - E84 flame spread 0/smoke density 1.8 smoke developed = 0
- Provides water and air tight seal
- Non-curing

Standard Construction

- 3/16" x 5/8" x 25'
- Cardboard core
- Gasket is rolled onto a smooth silicon release paper

Installation Instructions

- Easy installation of Metal Zinc's Butyl Gasket in flanged ductwork systems.
- Apply gasket directly to metal flange with paper backing, trim to fit, and press gasket to ensure tight fit to flanged connection. Gently peel off silicon release paper in preparation with connection to second metal flanged connection.
- For best results ensure metal surface is clear of duct, dirt, oil, etc.
