

Product data sheet

Spiral Elbow

Description

- Metal Zinc's Spiral Seam Elbow creates strong, versatile change in direction for medium & high pressure applications.
- Constructed using a Spiral Seam Elbow machine – utilizing the Spiral Seam RL-1 as used on Spiral Pipe.

Features

- Quick and easy installation due to a "fitting size" 3in. straight-in and straight-out along with a raised bead for coupling with spiral pipe
- 1.5" Radius spiral seam 90 degree elbow
- No gore sealings required

Standard Construction

- 24 & 26 GA galvanized steel ASTM A653
