

PLENUMS, FILTER BOXES, RACKS, BASES AND TRANSITIONS

3.2

Dual Filter Box

Description

Metal Zinc's Dual Filter Box is a great solution for people wanting a low cost alternative to traditional media cabinets and plenum. With a factory installed end cap, the dual filter box accepts any individual return duct, saving the contractor both time and money.

Features

Space for up to 5" media filter

1" new construction/per-filter

Insulated to R6 specifications or un-insulated

Comes assembled

Factory provided adaptor angles allowing contractor to adapt filter box outlet to any cabinet, no transition needed

Standard Construction

26-gauge galvanized steel ASTM A653

Metal or ductboard end cap

Extra strong snaps and hinges on filter door section

Factory installed gasket on door significantly lowers air leakage

1" flange in with unit adaptor angles for connection to blower cabinet

6 standard sizes for media section

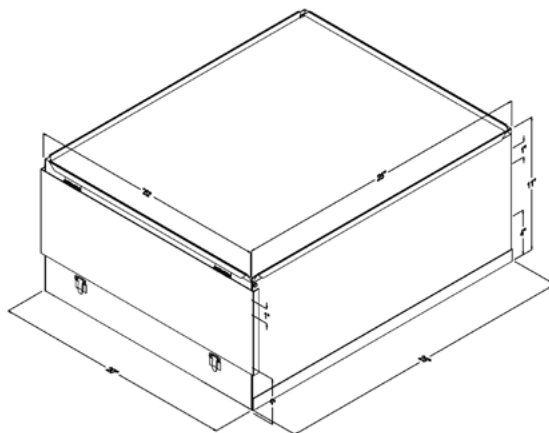

Optional Construction

Boxing for resale

Media filters available

Special gauges or filter sizes

R4 and R8 insulation
